

Innovation is a Skill. Help Your Team Build It.

Monarch Strategies LLC can help you drive innovation in your organization in three distinct ways.

Problem-Solving: We will design and conduct creative problem-solving sessions with your stakeholders on site and virtually.

Project Management: We will work with you to implement the action plan. We'll support you as you gain further buy in and lead the change.

Build Capacity: We will design and deliver a custom training plan to develop facilitators and coaches in your organization who lead innovation design sessions.

Our Methodology

Simplexity is an innovative thinking & creative problem-solving process that separates innovation into clearly-defined steps, to take you from initial problem-finding right through to implementing the solutions you've created.
